Technical Profile

Senior Full Stack Developer with 11+ years of experience building performant, accessible, and user-centered web applications. Expert in modern frontend frameworks (Vue, React) with a proven ability to pick up new ecosystems quickly. Strong full-stack competency with experience optimizing backend APIs and databases. Passionate about gaming culture, community wellness, and scaling digital tools that eliminate barriers to mental health support.

- **Frameworks & Libraries:** Vue.js, React, Remix, Next.js, Svelte (Conceptual), TypeScript, Tailwind CSS
- **Platform & Architecture:** RESTful APIs, Ruby on Rails, Monorepos, Design Systems
- **Testing & Quality:** Vitest, Cypress, Jest, React Testing Library, WCAG 2.2 Accessibility Expert
- **Tooling & CI/CD:** Vite, Node.js, Go (Optimization), Mixpanel, CircleCI
- **AI & Development:** Cursor/Claude Workflows, GitHub Copilot, Prompt Engineering, Automation Pipelines

Professional Experience

Cisco (via Experis), Software Engineer | August 2022 – Present

- Assumed ownership and scaled a framework-agnostic component library, re-engineering workflows to better suit internal development needs, decreasing time-to-delivery by 50% across product teams
- Served as the primary accessibility point person for a platform-wide audit, developing reusable, WCAG-compliant components that resolved 80% of identified issues
- Partnered with backend teams to debug Go-based services and optimize REST API designs, ensuring fast, data-efficient delivery for customer-facing applications
- Integrated Mixpanel telemetry and replay tracking to monitor real-time user behavior, using heatmaps to resolve systemic friction points
- Mentored junior developers and established code quality standards through structured code reviews, reducing onboarding friction and boosting team development

Sports Warehouse, Frontend Web Developer | January 2013 – August 2022

- Built custom internal tools that let Product Managers update features on their own, speeding up product releases by 20% across 12 web platforms
- Led the company's first accessibility audit to meet WCAG standards, reducing legal risk while boosting SEO and site performance by 25%
- Leveraged Google Analytics to isolate drop-off points, redesigning key UI checkout funnels to improve overall user conversion rates and engagement
- Maintained high-quality, 'pixel-perfect' interfaces for high-traffic sites, balancing technical standards with fast business growth
- Coached and onboarded junior frontend developers on design system workflows, reducing initial feature development ramp-up time

Technical Projects

FFXIV Raid Tracker (Personal Project) | Node.js, Vue, Axios

- Developed a data visualization tool that pulls from game APIs to track rare items for an 8-person group, replacing manual spreadsheets with an automated dashboard

Education & Certifications

- **Full-Stack Web Development Certificate** | CareerFoundry
- **Front-End Web Development TechDegree** | Team Treehouse
